

CLIENT FEATURE OVERVIEW

Learning Management System

A unified platform for curriculum delivery, student administration, assessments, live learning, and performance reporting.

Admin Panel + Student App
Feature Summary

LMS Platform

One Connected Learning Ecosystem

The LMS combines a powerful administration workspace with a focused student learning experience. Administrators can structure content, manage cohorts, conduct assessments, and review outcomes while students access only the learning and assessments assigned to them.

Admin

Curriculum, users, batches, content, assessments, reports, and live-class operations.

Student

Secure access to assigned courses, lessons, quizzes, exams, and performance history.

Backend

Frappe-powered permissions, records, enrollment rules, APIs, and reporting workflows.

1 Structured Learning

- Programs, course groups, courses, chapters, and lessons
- Reusable content and configurable curriculum order
- Video, rich-text content, notes, and lesson quizzes

2 Assessment Engine

- Question bank, quizzes, and multi-section exams
- Timing, attempts, pass marks, and negative marking
- Automated scoring and detailed answer reviews

3 Controlled Access

- Direct course and batch-based enrollment
- Program-based course assignment
- Role-aware administration workspaces

4 Measurable Outcomes

- Student dashboards and assessment history
- Pass/fail and section-level performance
- PDF reports delivered by email

Flexible deployment: The platform supports institution-specific application identity, icons, favicon, descriptive text, and primary and secondary brand colors.

Curriculum and Content Management

Programs and Learning Paths

- Create, edit, publish, and delete programs
- Add new or existing courses
- Rearrange courses into the required learning sequence
- Separate published and draft records

Courses and Course Groups

- Create and organize grouped course collections
- Maintain introductions and detailed descriptions
- Assign instructors and control publication status
- Filter courses by program and status

Chapters and Lessons

- Create, edit, delete, assign, and reuse lessons
- Rearrange chapters and lessons
- Identify assigned and unassigned lesson content
- Filter by program, course, chapter, quiz, and status

Rich Lesson Authoring

- Rich-text student-facing lesson content
- Private instructor notes
- YouTube and Vimeo video links with preview
- Quizzes attached directly to lessons

Integrated Video Library

Capability	Included Functions
Organization	Root folders, subfolders, breadcrumb navigation, folder rename and move
Video Upload	Vimeo upload integration, upload progress, processing and transcoding status
Video Management	Edit title, description, thumbnail, and privacy settings
Synchronization	Synchronize video and folder records with Vimeo
Lifecycle	Delete local records with optional deletion of remote folder content

Assessments and Examination Management

Question Bank

- Reusable centralized question library
- Choice, user-input, and open-ended questions
- Multiple correct answers and answer explanations
- Accepted text-answer variants
- Marks assigned at question level
- Course-group and lesson categorization

Quiz Builder

- Add new or existing questions
- Rearrange question order
- Set passing percentage and attempt limits
- Timed or untimed delivery
- Question shuffling and question-count limits
- Optional answer and history visibility

Exam Builder

- Create aptitude tests and formal exams
- Combine quizzes into multiple exam sections
- Assign exams to one or more programs
- Set mandatory and optional sections
- Configure section sequence and categorization
- Automatic total-marks calculation

Assessment Rules

- Overall and section-level passing requirements
- Negative marking and configurable deductions
- Result-visibility control
- Maximum quiz attempts
- Time-bound assessments
- Review of individual quiz submissions

Reusable by design: Questions can be reused across quizzes, and quizzes can be reused as sections within larger formal examinations.

Submission Review and Reporting

- Complete exam submission history with candidate, exam, score, result, and date
- Section-by-section score and performance breakdown
- Direct access to underlying quiz submissions
- Detailed report preview before delivery
- PDF report generation and email delivery to the student
- Report resend and sent-status tracking

People, Operations, and Oversight

Dashboard

- Counts for programs, courses, chapters, and lessons
- Question, quiz, exam, and submission totals
- Student, batch, instructor, and live-class totals
- Pass/fail summary and recent submissions

Batches

- Online and offline learning cohorts
- Program and instructor assignment
- Start/end dates and daily schedules
- Published and draft batch states

Enrollment and Users

- Searchable platform-user directory
- Enroll members into batches
- Edit and remove batch enrollments
- View program and batch assignments

Instructors

- Create and manage instructor profiles
- Assign instructors to one or more courses
- Filter instructors by course
- Update or remove instructor assignments

Zoom Live Classes

- Schedule, update, and cancel live sessions
- Link a session to a learning batch
- Set title, description, date, time, and duration
- Select a connected Zoom account

Administration Experience

- Search, filters, pagination, and refresh
- Bulk deletion where supported
- Validation and destructive-action confirmation
- Permission-based workspace navigation

Learning Experience

Secure Access

- Passwordless email OTP login
- OTP-based student registration
- Secure session restoration
- Safe account logout

Personal Dashboard

- Personalized welcome experience
- Best assessment score
- Average score and attempt count
- Focused learning overview

Assigned Course Access

- Direct course enrollment
- Courses provided through a batch program
- Courses assigned directly to a batch
- Access limited to the student's enrollment

Course Browsing

- Course image, category, introduction, and description
- Rating, chapter count, and lesson count
- Complete curriculum by chapter
- Direct navigation into individual lessons

Lesson Delivery

- YouTube and Vimeo video playback
- Rich-text lesson notes and content
- Assignment prompt display
- Supporting instructor notes when provided

Lesson Assessments

- Quizzes embedded into lesson flow
- Direct quiz launch from the lesson
- Immediate result presentation
- Answer review when permitted

Quizzes, Exams, and Results

Practice Quizzes

- Assigned standalone and lesson-based quizzes
- Timed and untimed quiz modes
- Passing score and attempt-limit display
- Single-answer, multiple-answer, and text-input questions
- Automatic submission when time expires
- Immediate score and percentage calculation

Formal Exams

- Assigned official and aptitude examinations
- Multi-section exam delivery
- Duration, marks, pass score, and rules before starting
- Mandatory and optional section identification
- Answered, remaining, current, and flagged indicators
- Answer review before final submission

Attempt Continuity

- Exam answers saved as a draft
- Interrupted attempts can be resumed
- Section submission and final exam submission
- Clear exit and continue controls

Performance History

- Separate quiz and exam result history
- Score, percentage, date, and pass/fail status
- Section-level examination results
- Retry option for eligible quizzes

Detailed Answer Review

Result Area	Student Visibility
Summary	Score, percentage, pass mark, correct, incorrect, and unanswered totals
Question Review	Question content and the student's submitted answer
Correct Answer	Displayed when the quiz or exam configuration permits it
Explanation	Answer explanation and review topic when provided
Exam Report	Access to the generated detailed report when available

Student profile snapshot: Students can view their display name, email address, enrolled program, and assigned batch.

Built for Institutions and Learners

Area	Platform Capability
Branding	Institution-specific application text, description, icon, favicon, and brand colors
Permissions	Frappe role permissions and role-aware administrative workspace access
Responsiveness	Layouts designed for desktop, tablet, and mobile browser sizes
Navigation	Dedicated dashboard, courses, exams, results, and profile destinations for students
Content Security	Enrollment-driven course access and protected backend sessions
Operations	Search, filtering, pagination, loading states, error recovery, and refresh controls
Reporting	Assessment history, sectional analytics, report preview, PDF generation, and email delivery

Complete Learning Operations

From curriculum creation and student enrollment to assessment delivery and detailed performance reporting, the LMS provides the core tools required to operate a modern digital learning program.

This document describes functionality confirmed in the current LMS Custom backend, LMS Admin application, and LMS Student application.
